

Michigan COMMUNITY INTEGRATED PARAMEDICINE Treatment Protocol

SUBSTANCE USE DISORDER CARE

Initial Date: November 19, 2020

Revised Date: Section 11-63

This protocol is for trained CIP Paramedics only. If during assessment, procedure, or treatment the patient is found to have a medical emergency in need of hospital treatment, the CIP visit will be suspended, and local MCA protocols utilized.

Purpose: To provide additional guidelines beyond the CIP General Assessment and Care for evaluating, caring for and educating patients with Substance Use Disorder.

- I. Follow CIP General Assessment and care protocol
- II. Obtain additional vital signs, history, and diagnostics pertinent to condition and/or as ordered by physician which may include:
 - a. Vitals/examinations:
 - i. Site infections/wounds
 - ii. COWs assessment/score
 - iii. CIWA assessment/score
 - iv. Signs of substance intoxication
 - v. Oral health
 - vi. Hygiene
 - b. History:
 - i. Evaluate risks for concurrent polysubstance use
 - ii. Use history for prescribed medications and illicit substances
 - iii. Intervention history
 - iv. Immunization status
- III. On scene medication administration may include:
 - a. Use of approved MCA protocols and medications up to the extent of standard paramedic treatment according to protocol.
- IV. On scene interventions may include:
 - Vaccinations see CIP Vaccination protocol (optional)
 Wound Care see CIP Wound Care protocol (optional)
 Naloxone Leave Behind see CIP Naloxone Leave Behind protocol (optional)
 - d. Medication Assisted Therapy (MAT) for Opioid Use Disorder see CIP

 Medication Assisted Therapy protocol (optional)
 - e. Intervention resource referrals
- V. Consider transport to the emergency department for the following:
 - a. COWS score >36
 - b. CIWA score greater than or equal to 9
- VI. On-scene education and suggested support sources may include:
 - a. Harm reduction/safer use education
 - b. Syringe Service Program (SSP) opportunities

Michigan COMMUNITY INTEGRATED PARAMEDICINE Treatment Protocol

SUBSTANCE USE DISORDER CARE

Initial Date: November 19, 2020

Revised Date: Section 11-63

- c. Risks of self-medicating
- d. Withdrawal risks
- e. Local resources

COWS Wesson & Ling, J Psychoactive Drugs. 2003 Apr-Jun;35(2):253-9. Clinical Opiate Withdrawal Scale

Resting Pul	se Rate: beats/minute	GI Upset: over last 1/2 hour		
Measured after patient is sitting or lying for one minute		0 No GI symptoms		
0	Pulse rate 80 or below	1 Stomach cramps		
1	Pulse rate 81-100	2 Nausea or loose stool		
2	Pulse rate 101-120	3 Vomiting or diarrhea		
4	Pulse rate greater than 120	5 Multiple episodes of diarrhea or vomiting		
Sweating: a	wer past 1/2 hour not accounted for by room temperature or patient	Tremor observation of outstretched hands		
activity.		0 No tremor		
0	No report of chills or flushing	1 Tremor can be felt, but not observed		
1	Subjective report of chills or flushing	2 Slight tremor observable		
2	Flushed or observable moistness on face	4 Gross tremor or muscle twitching		
3	Beads of sweat on brow or face	129 No. 200 No		
4	Sweat streaming off face			
Restlessnes	s Observation during assessment	Yawning Observation during assessment		
0	Able to sit still	0 No yawning		
1	Reports difficulty sifting still, but is able to do so	1 Yawning once or twice during assessment		
3	Frequent shifting or extraneous movements of legs/arms	2 Yawning three or more times during assessment		
5	Unable to sit still for more than a few seconds	4 Yawning several times/minute		
D., 3.4.		Anxiety or irritability		
Pupil size	Don'd a tour day a series for the Mark	0 None		
0 1	Pupils pinned or normal size for room light	Patient reports increasing irritability or anxiousness		
2	Pupils possibly larger than normal for room light	2 Patient obviously irritable anxious		
5	Pupils moderately dilated	4 Patient so irritable or anxious that participation in the		
3	Pupils so dilated that only the rim of the iris is visible	assessment is difficult		
Bone or Joi	nt aches If patient was having pain previously, only the additional	Gooseflesh skin		
	attributed to opiates withdrawal is scored	0 Skin is smooth		
0 -	Not present	3 Piloerrection of skin can be felt or hairs standing up		
1	Mild diffuse discomfort	arms		
2	Patient reports severe diffuse aching of joints/ muscles	5 Prominent piloerrection		
4	Patient is rubbing joints or muscles and is unable to sit still because of discomfort	2000 to the South South - Merchall (2004) Advisor (1004)		
Runny nose	or tearing Not accounted for by cold symptoms or allergies			
0	Not present	Total Score		
1	Nasal stuffiness or unusually moist eyes	The total score is the sum of all 11 items		
2	Nose running or tearing	Initials of person completing Assessment:		
4	Nose constantly running or tears streaming down cheeks			

Score: 5-12 mild; 13-24 moderate; 25-36 moderately severe; more than 36 = severe withdrawal
