

Michigan
COMMUNITY INTEGRATED PARAMEDICINE
Program Protocol
CIP PROGRAM ENROLLMENT

Initial Date: July 23, 2020

Revised Date:

Section 11-06

Purpose: To provide guidelines for patient enrollment into Community Integrated Paramedicine Programs.

- I. Enrollment to a CIP program will be necessary in the following situations:
 - a. A physician's referral
 - b. Anticipation of more than 1 visit (includes but not limited to phone, telehealth/telemedicine, in person).
- II. Enrollment will include:
 - a. Physician's referral (physician name should be documented in EPCR)
 - b. Documented patient consent
 - c. Documented intake assessment including but not limited to:
 - i. Physical assessment with notation to overall physical and mental statuses and limitations both physical and cognitive
 - ii. Fall risk reduction assessment **see Fall Risk Reduction Assessment protocol**
 - iii. Social determinants of health assessment **see SDOH Assessment protocol**
 - iv. Medication audit **see Medication Audit protocol** (optional)
 - d. Development of a service plan/care plan
- III. Patient enrollment including the intake assessment must be documented within the EPCR or attached to the EPCR
- IV. Whenever possible CIP services should work in conjunction with already established services available within the community.
